

Diana Sagoyan

Software Engineer | AWS Certified | Full Stack Developer

dianasagoyanit@gmail.com | 301-742-7747 | [linkedin.com/in/diana-sagoyan-developer/](https://www.linkedin.com/in/diana-sagoyan-developer/)

Professional Summary

AWS certified Cloud Practitioner and Developer with 3+ years of professional experience designing, building, and optimizing Java-based web applications using the Spring ecosystem. Expert in developing scalable RESTful APIs, improving backend performance, and implementing secure authentication systems. Backed by a strong foundation in cloud-native development and distributed systems, focused on building reliable, scalable, and maintainable backend solutions.

Technical Skills

Languages: Java, JavaScript, TypeScript

Backend: Spring Boot, Spring MVC, Spring Security, Spring Cloud, Spring AOP, Node.js, Express

Frontend: React, HTML, CSS

Databases: PostgreSQL, MySQL, JPA/Hibernate, Prisma ORM

Cloud & DevOps: AWS (Cloud Practitioner, Developer), CircleCI

IDE: IntelliJ IDEA, VS Code

VCS: Git, GitHub, Bitbucket

Architecture & Concepts: RESTful APIs, Microservices, Authentication & Authorization (RBAC), Agile

Professional Experience

Java Developer, Fidexio - June 2023 - Present

- Engineered a business management system using Java 11 and Spring Boot, delivering core modules for inventory, invoicing, and client/vendor operations
- Integrated a third-party currency exchange API using Spring Cloud OpenFeign to provide real-time exchange rate data for financial operations
- Improved database query performance by up to 20% by optimizing JPA queries and refining schema design, reducing data retrieval latency in key application workflows
- Designed and implemented RESTful APIs using Spring Boot, documenting endpoints with OpenAPI/Swagger to enable seamless integration for frontend and third-party consumers
- Resolved database write bottlenecks in inventory workflows by implementing concurrency control mechanisms (optimistic locking), improving data consistency and system reliability
- Implemented role-based access control using Spring Security, securing REST endpoints and enforcing fine-grained authorization across application features
- Improved application UI/UX based on client feedback, delivering enhancements that were reviewed and approved by stakeholders
- Increased unit test coverage to 85% using JUnit 5 and Mockito, reducing regression defects and improving stability of core backend services

Full-Stack Developer - My Bookshelf App (Personal Project)

- Designed and developed a full-stack web application from scratch using React, Node.js, and Express, with a clear separation between frontend and backend services communicating via RESTful APIs
- Architected and implemented a relational PostgreSQL database schema using Prisma ORM, leveraging migrations for version control and maintainability
- Built scalable RESTful API endpoints following controller–service–middleware architecture to ensure clean separation of concerns
- Implemented secure authentication using JWT and user session management

- Configured CORS policies to enable secure cross-origin communication between frontend and backend services
- Designed application UI/UX in Figma, translating designs into responsive and user-friendly interfaces

Dec 2021 - June 2023: Career development period focused on AWS certifications, deepening knowledge of both frontend and backend, and building independent projects.

Telecommunication Store Manager, Team Telecom Armenia — Aug 2017 – Dec 2021

- Managed a team of sales representatives, improving customer satisfaction.
- Resolved customer complaints and internal conflicts efficiently.
- Mentored and trained new hires and interns, reducing ramp-up time and strengthening team performance

Certifications

AWS Certified Developer – Associate (2025–2028)

AWS Certified Cloud Practitioner (2023–2028)

Education

Bachelor of Management: Armenian State University of Economics (ASUE) 2013 - 2017
